

# A GOLDEN THANK YOU FROM SUCCEED

Off the back of an impressive year (2015-2016) where we took home six UKOUG awards in October, including a hat-trick of Golds!

Over the last 4 years we have invested heavily in the future, in order to deliver future-proof technologies to our clients. We have not only diversified our core PeopleSoft business and fully embraced Oracle's Cloud applications with a number of adopters in the UK. We have also responded to our clients business needs and invested in our own 'Platform-as-a-Service' allowing our PeopleSoft and Cloud clients to bridge any business gaps in their HR solution.

Receiving awards across these new areas too is testament to the high level of expertise both within the consulting

and development teams here at **Succeed** which we believe highlights the appetite within the UK market for these services.

Steve Elcock, CEO, said "I would like to take this opportunity to say a very big thank you to all our clients that voted for us. We are delighted to be so highly respected by the Oracle user community and we will continue to strive to deliver technologies that meet the needs of their businesses and deliver real value".

Voted purely by UKOUG members (4,600 of you!) these awards are especially prized.

John Whitby, Chief Commercial Officer, said "Winning a Partner of the Year Award is the highest accolade any partner can receive. To receive 6 awards, voted for by our clients, provides real recognition of all the hard work and commitment of the consulting teams and software engineers within **Succeed** who work on a day to day basis to deliver successful Oracle projects time and time again".
